As a part of the series of events produced by the NYC Faith in Action Coalition for AIDS Prevention, Care, and Education (www.nycfia.org), CHAMP will host a community conversation addressing the current state of faith-based efforts for HIV prevention in New York City.

This forum explores ongoing HIV prevention justice efforts and new directions for interfaith and intra-faith community responses to HIV/AIDS, particularly addressing structural issues driving the domestic epidemic such as homophobia and mass imprisonment. Come join in the conversation with leaders from local faith communities who are working to build affirming outreach and programs to address the root causes of vulnerability amongst their members and in their communities.
